

CalcMaster®

Innovative advising and calculation software

As partner on table with:

Product designer – Mould maker- Injection moulder

Purchasing - Sales and Management

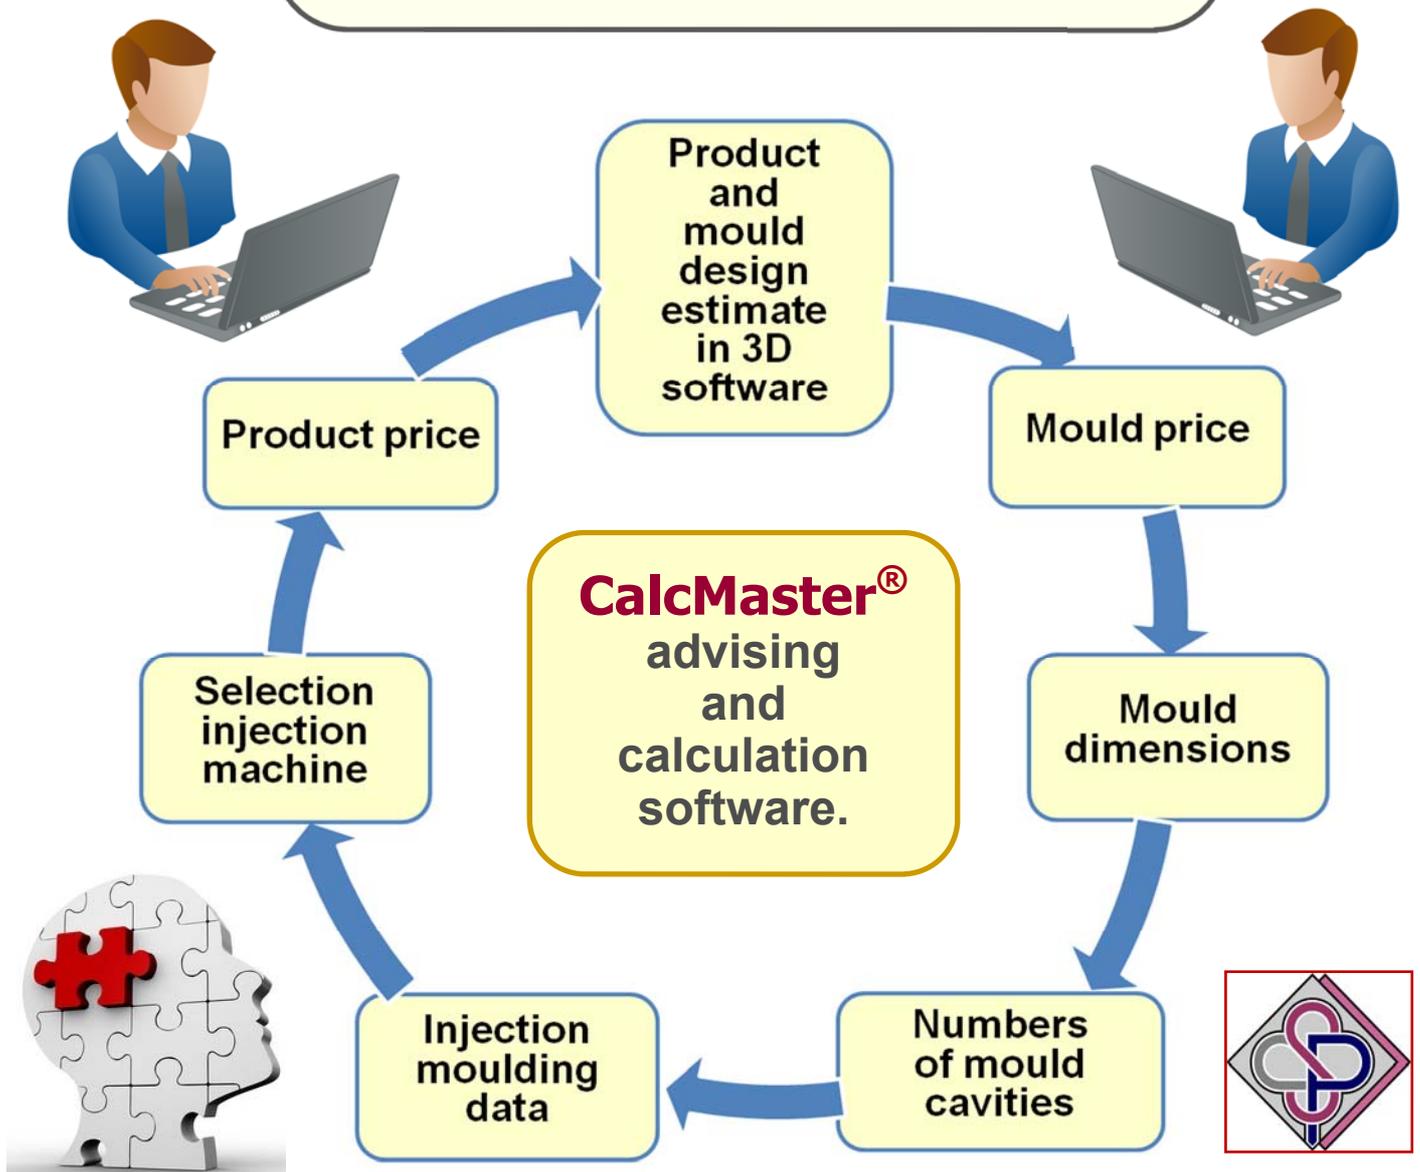

CalcMaster software

Our proposal for a
CalcMaster internet demonstration.

We use the Microsoft TEAMS.

Calculation with your own products.

You can use the Trial version.

CalcMaster advising and calculation software for the right mouldcosts optimizing

Our first proposal are:

CalcMaster internet demonstration.

We can give you an internet CalcMaster demonstration with Microsoft Teams from about 60 minutes.

You can see then the real total CalcMaster calculation on your PC or Notebook screen.

Our first proposal is:

We can give you a CalcMaster Demonstration. For the first demonstration we take our own product Wall contact box.

After the CalcMaster demonstration from the Wall contact box we can make the CalcMaster calculation from **your own** 1 or 2 of injection moulding products.

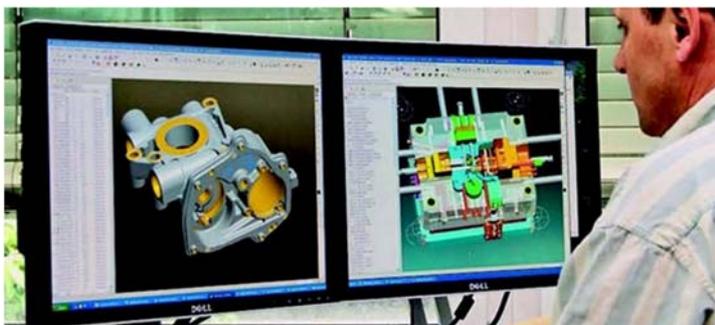

We offer you the day and the time for making the CalcMaster demonstration.

We can offer you:

We offer you the **CalcMaster TRIAL** version for 4 weeks .

Ask for the cost of the CalcMaster Trial version.

We can make you an offer for the CalcMaster software.

We offer you an Internet **Microsoft Teams**
CalcMaster demonstration.

We want to use your own normality
injection molding products for this
demonstration of the total calculation.

The demonstration lasts about 60-90 minutes

CalcMaster® software demonstration.
We want to answer all your questions!

Product
calculations
of your own products
Look to the next page

Business advising and product costs optimizing
Project- Product design– Mouldmaking– Moulding process,
Advising for a plastic injection moulding product

Discuss foundation for
commercial und **technical**
people.

CalcMaster software

is an **interactive**
software with a direct
connection between
the:

Product design

the

Mould costs

the

Mould dimensions

the

Injection moulding data

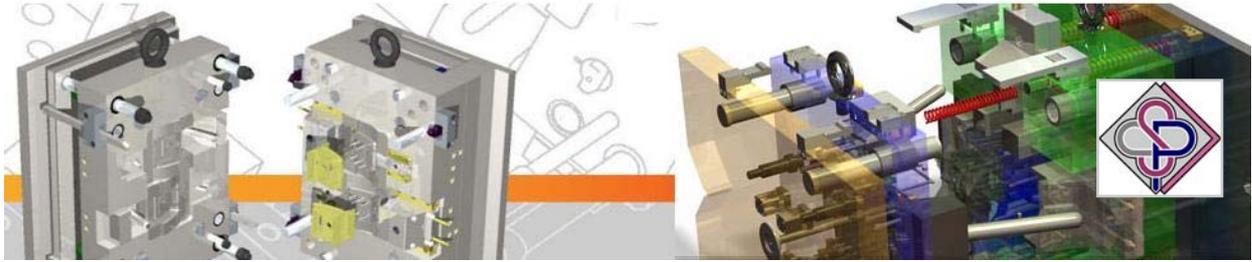

the

**selection of the
Moulding machine**

and the

Product price.

You save many time, with the calculation of a injection moulding product

CalcMaster® software demonstration with Teams. YOUR OWN Injection moulding products.

We show you the complete CalcMaster software calculation of the product “ **Wall contact box** “ Better is at that we can make the calculation of **1 or 2** of **your own** injection moulding products.

We have the experience that you have an lot of questions after the first product calculation. Now we can give you an answer on your questions step by step. We are doing this with the calculation from about **2 till 4** of your **own injection moulding products**.

For special questions we take extra time to explain your **step by step** what is the best solution.

For the calculation of your own injection moulding products.

You have to prepare everything very well !

Look for about **2 till 4 own** injection moulding products which you want to calculate. For the mould calculation you don't need extra information. For the calculation of your products we need a good **CAD file in STL format** (Max size ca.10 MB).

Information that we need before the CalcMaster software demonstration.

You have send us before the CalcMaster software demonstration from about **2 till 4** products the next information by email. We want prepare all your products before, so that we lose not to much time during the demonstration.

If possible we need the next information's about your own injection moulding products.

- 1- CAD product in a **STL** format from each product.
If you not have a good STL format you can send us the CAD file in a **STEP** file
- 2- Plastic material of the product.
- 3- How many cavities have each mould ?

We want to answer all your questions

INTERNET- Teams presentation. (you make us a proposal for a day and time)

We have the possibility to **show you** the working of the CalcMaster software by internet via **Teams**.

The demonstration will take about 60 till 90 minutes.

If we have a good **Teams** connection then we **don't need** the normal phone connection.

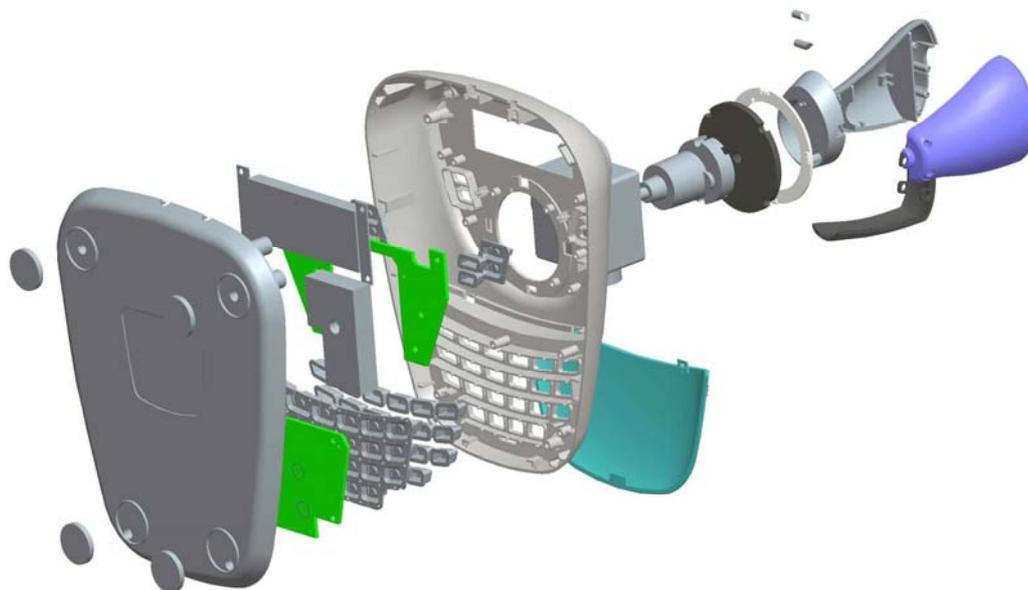

You also need to have a notebook or PC with a **speaker** and **microphone**, or a **headset with microphone** (with USB connection). If we have not the right connection then you call us under nr. **+31-344-61 61 61**.

Normaly we take for the demonstration our products “ **Wall contact box** “ and “ **Montage Cap** “.

For the internet demonstration we send you 10 minutes before (**+31-344-61161**) the start of the demonstration the right “ Link “.

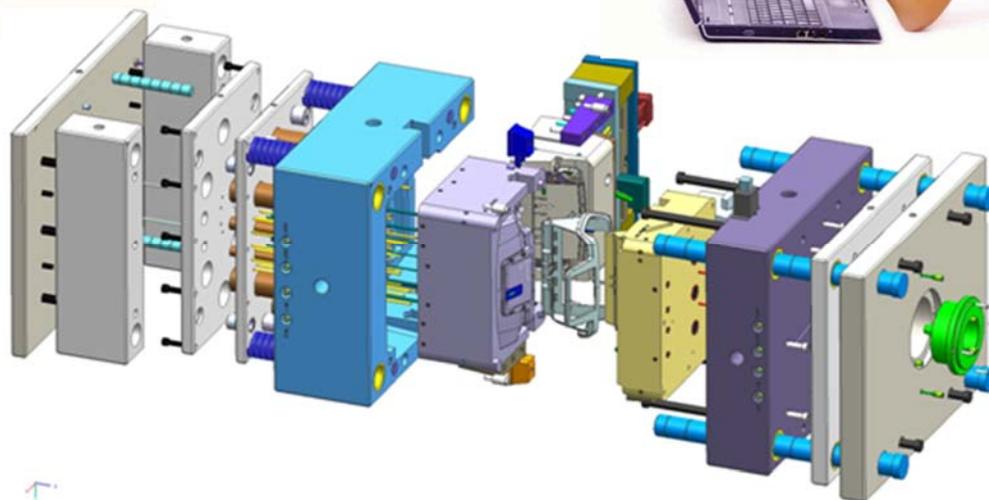

Starting the Conference call with the software Teams.

We want to send you a “Link “ with email.

With designing a new
moulding product.
use then the
CalcMaster software

CalcMaster® Innovative software

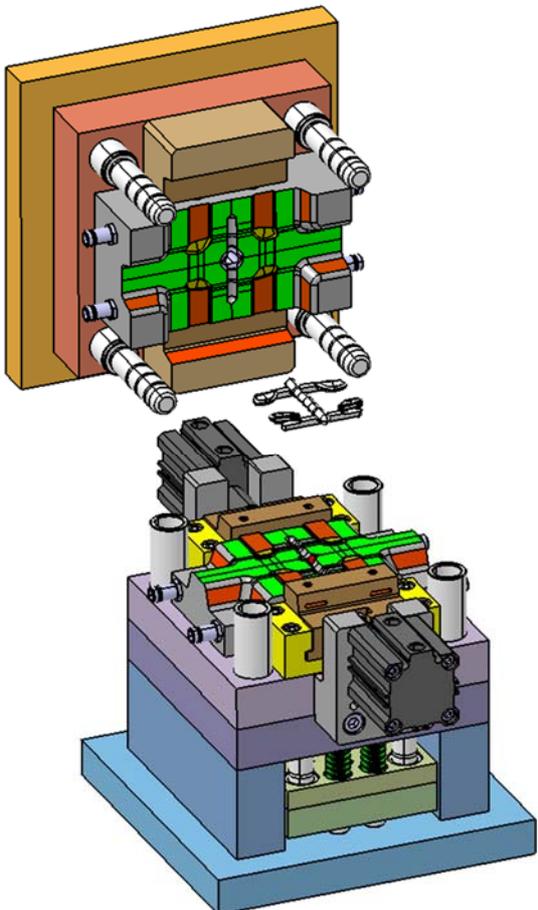

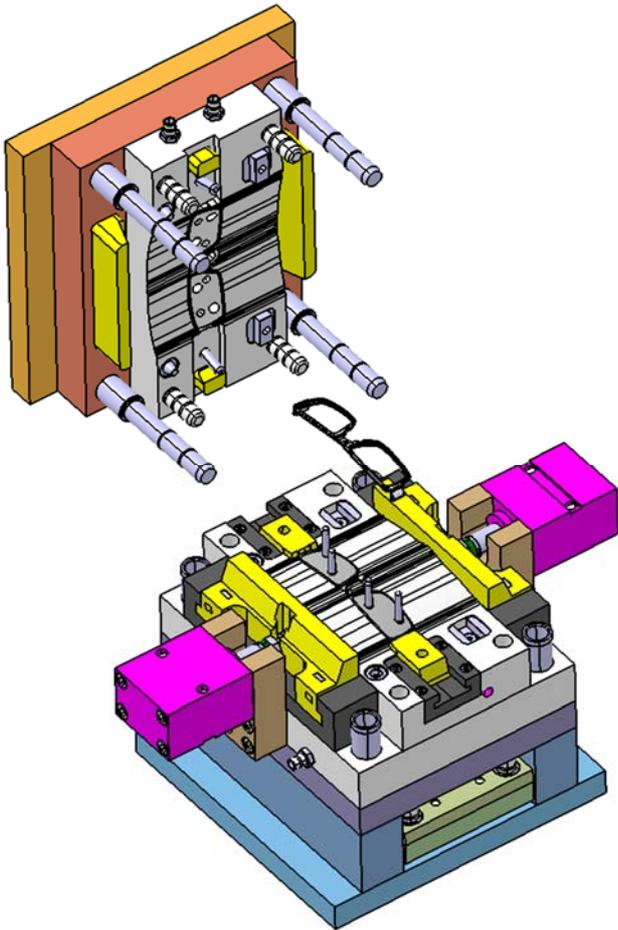

CalcMaster[®] advising and calculation software

Makes the mould, moulding and product calculation very easy

CalcMaster[®] Innovative software

During the designing of the **product** you have the possibility on a simple way to calculate directly the

Mould price
and the
Product price

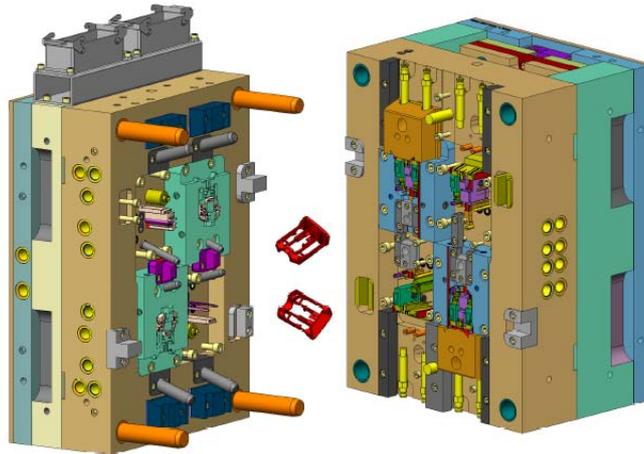

with the
CalcMaster software

You have then also the possibility to make a corrections on your product design.

You want to design also a **cheap** product design ?

Use also the
CalcMaster software

CalcMaster[®] advising and calculation software

Injection molding software for optimization and calculation of injection molded products

Made Project- Mold- and Product calculation very easy.

Is the most comprehensive injection molding software for:

The Standard CalcMaster software calculates for you very fast the:

- Moldprices
- Detailed mould hours
- Injection molding data
- Most economical quantity of cavities
- Complete costprice of the product
- Asking a quotation for a moldprice
- Making a quotation for a moldprice
- Print out the total calculation
- 12 languages
- Mould maker user profiles
- Settings for different mould makers

The Optional CalcMaster part for the mold and injection molding software calculates for you very fast:

- 2 Components in 2 cavities
- 2 Components in 1 cavity
- Left and Right product
- Stack molds
- Softtools molds
- 1+1 Product in the mold
- You can send all the calculated data to an automotive Excel sheet
- Suppliers cost overview data sheet

The **Professional** CalcMaster software is the **Standard + Optional** CalcMaster part

CalcMaster Modules

- **CalcMaster - i-Know Moulding 3D software**
i-Know Moulding Works with the STL-file CAD format.
With 3D mould plates overview. Mould parting lines 3D on your screen.
With automatic parameter transfer of data for a fast mould calculation.
A directly mould calculation is possible.
- **CalcMaster Mould Dimensions.**
Mould dimensions for 1 to 96 cavities.
Calculation of all the mould plates dimensions.
You can select the steel type for each separate plate.
- **CalcMaster Selection of the injection machine.**
After the calculation from the CalcMaster Menus 1 - 2 - 3 and 4
this module can automatically find the right injection moulding machine.

CalcMaster®

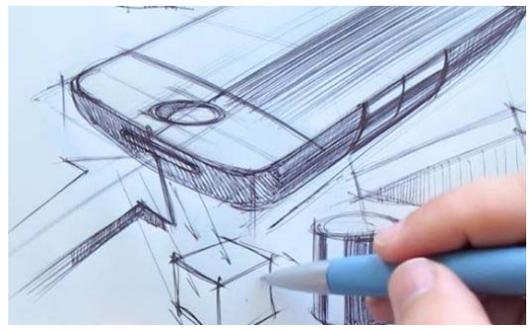

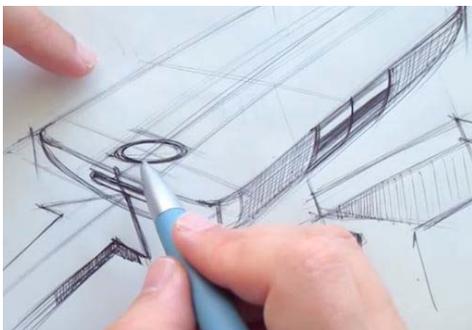

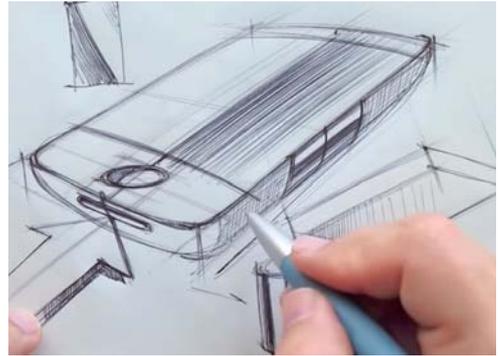

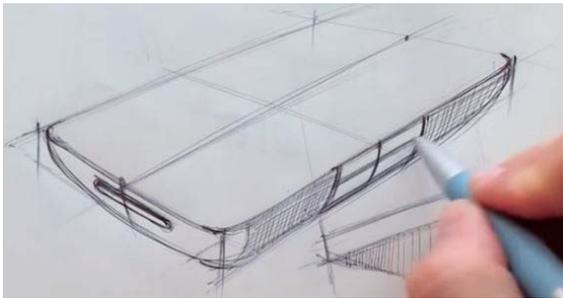

Innovative advising and calculation software

As partner on table with:

Product – Mould designer – Purchasing - Sales and Management
Mould maker- Injection moulder and Management

CalcMaster give you the right solution
at the **start** of the new **project design**.

Working with the **CalcMaster** software
giving you **Certainty** and much **Self-confidence**
